

# VIRTUAL MEMORY & LANGUAGE STUDY

Dr. Taler's laboratory in the School of Psychology at the University of Ottawa is looking for people to take part in a virtual study from the safety and comfort of their homes. The study takes place over two sessions, one over the phone and one online, for a total commitment of 1.5-2 hours.

We are searching for participants aged 55+ to take part in a study of language processing. We are looking for people who are fluent in English and French and are in good health. Participants will be compensated for their time.
